Friends.....

If you love the Finger Lakes as I do...

Please...

(1) Take a few moments to view the attached videos.

“Fracking the Finger Lakes” by Restoration Ecologist Kevin Heatley:

<http://www.youtube.com/watch?v=-KiVESAIJxQ>

“Heavy Frackick” on the Fracking Traffic in Pennsylvania:

<http://www.youtube.com/watch?v=KZZQxe6FiGA>

Fracking in the Finger Lakes = Industrialization of the Finger Lakes = Destroying for generations.....if not forever.....the unique beauty and tranquility of our region....and seriously weakening, if not destroying, our Wine, Agriculture, and Tourism Industries.

Can you imagine this air polluting "Frackick" hauling water, toxic chemicals and wastes...all the while spewing out heavy exhaust fumes... through Hammondsport, Watkins Glen, or Ithaca..... along our Town, County and State Roads with their tractors, bicycles and buggies.....or along our Wine Trails?

.....Or our beautiful and productive farms laced with pipelines and access roads, and dotted with gas wells, compression stations, gas storage facilities and waste disposal ponds?

I can. And the prospect really distresses me.

(2) In support of positions taken by the Yates County Legislature, the Keuka Lake Association, the Finger Lakes Land Trust, and many other towns, villages and organizations across the region, please join the rapidly growing movement to ban horizontal, high pressure, slick water hydrofracking in the Finger Lakes Region and its watersheds...and to give our watersheds equal protections with those of Syracuse and NYC.

Sign the petition to our State Legislators at

<http://www.moveon.org/r?r=266018&id=32298-9404747-r%3D5VrZx&t=2>

And finally....

(4) Forward this email and the links to these videos and the petition to all of your friends and ask them to do the same.

Thanks so very much....
